

RAL-GZ 411

Gütegemeinschaft Imprägnierte Holzbauelemente e.V. (Quality Assurance Association for Impregnated Timber Construction Elements)

The RAL-"Gütegemeinschaft Imprägnierte Holzbauelemente e.V." is a voluntary association of producers of wooden products for garden, landscaping, playgrounds inclusive stakes for wine- and fruit growing and noise barriers. The impregnation quality of their products is much higher than the common standard quality. That's because the production is following very strenghts rules, controlled by a permanent self control organisation and additional quality inspections by neutral experts two times a year.

As a very important result of this extraordinary quality RAL-products have a service-life that ranges far above the average of products with the standard quality. Besides, the producer gives a producer warranty of 10 years.

Only products corresponding with the RAL-rules may be marked with the RAL-quality label. So, the RAL-quality label is a very important contribution to promote the protection of consumers.

The quality label of the Gütegemeinschaft Imprägnierte Holzbauelemente e.V. is standing for

- **very long service-life**
- **environmental friendly impregnation**
- **safety for all consumers**
- **producer warranty of 10 years**
